

## A Sermon on God's Plan

Sermon by Rev. Minister Angela Smith of COPE for December 8th, 2024 (and beyond)

This sermon is a meditative sermon in idea format for your consideration.

**MEDITATIVE IDEA:** Hydrogen has always existed since the beginning of the universe. First it took the form of invisible protons and about 370,000 years later formed the first atoms. "Analysis of experimental database reveals that the hydrogen bond (O:H-O) possesses memory to emit energy at a rate depending on its initial storage." Source: <https://pubs.rsc.org/en/content/articlelanding/2014/cp/c4cp03669g> Hydrogen communicates electromagnetically by emitting a specific radio wave frequency, known as the "hydrogen line" or "21-centimeter line," which is produced when a hydrogen atom undergoes a change in its energy state, specifically a spin-flip transition of its electron, resulting in the release of a radio wave photon with a wavelength of approximately 21 centimeters. In human DNA, hydrogen bonds are the crucial interaction that holds the two strands of the double helix together by connecting complementary base pairs (Adenine with Thymine, and Cytosine with Guanine), allowing for the specific pairing and replication of genetic information; with A-T forming two hydrogen bonds and C-G forming three hydrogen bonds per base pair. "Molecular hydrogen promotes wound healing by inducing early epidermal stem cell proliferation and extracellular matrix deposition." Source: <https://inflammregen.biomedcentral.com/articles/10.1186/s41232-023-00271-9> Reasonably believing Hydrogen is God, both scientifically and metaphysically as defined above being older than time, invisible, able to remember as well as communicate, with the power to bond DNA for life as well as heal living beings, it appears God's plan is to be the invisible hand that makes life possible. In other words, you wouldn't exist nor would any life at all without Hydrogen. As awesome as Hydrogen is, its plan for you appears to be simply for you to exist and make the best of it as all living things including plants, nonhuman animals, and animals share the same Hydrogen bonding of our DNA strands. You can anticipate Hydrogen's plans for you as being the same as that for any other individual living thing while respecting the dynamic variables of each existence as well as how one may effect another. The sun is approximately 73% hydrogen and one may infer that other stars have similar content. Albert Einstein said, "There are only two ways to live your life. One is as though nothing is a miracle. The other is as though everything is a miracle", the rest is up to you.
